## NYS Grades 3-8 Mathematics Common Core Learning Standards Testing Program Guidance-September-April / May-June

## Grade 3

| CCLS Code | Standard | Content Emphasis | Sept.-April / May-June Instructional Periods |
| :---: | :---: | :---: | :---: |
| Operations and Algebraic Thinking |  |  |  |
| 3.OA. 1 | Interpret products of whole numbers | Major | Sept.-April |
| 3.OA. 2 | Interpret whole-number quotients of whole numbers | Major | Sept.-April |
| 3.OA. 3 | Use multiplication and division within 100 to solve word problems in situations involving equal groups, arrays, and measurement quantities | Major | Sept.-April |
| 3.OA. 4 | Determine the unknown whole number in a multiplication or division equation relating to three whole numbers | Major | Sept.-April |
| 3.OA. 5 | Apply properties of operations as strategies to multiply and divide | Major | Sept.-April |
| 3.OA. 6 | Understand division as an unknown-factor problem | Major | Sept.-April |
| 3.OA. 7 | Fluently multiply and divide within 100 | Major | Sept.-April |
| 3.OA. 8 | Solve two-step word problems using the four operations. Represent these problems using equations with a letter standing for the unknown quantity. Assess the reasonableness of answers using mental computation and estimation strategies including rounding | Major | Sept.-April |
| 3.OA. 9 | Identify arithmetic patterns and explain them using properties of operations | Major | Sept.-April |
| Number and Operations in Base Ten |  |  |  |
| 3.NBT. 1 | Use place value understanding to round whole numbers to the nearest 10 or 100 | Additional | Sept.-April |
| 3.NBT. 2 | Fluently add and subtract within 1000 using strategies and algorithms | Additional | Sept.-April |
| 3.NBT. 3 | Multiply one-digit whole numbers by multiples of 10 in the range $10-90$ using strategies based on place value and properties of operations | Additional | Sept.-April |
| Number and Operations--Fractions |  |  |  |
| 3.NF. 1 | Understand a fraction 1/b as the quantity formed by 1 part when a whole part is partitioned into $b$ equal parts; understand a fraction $\mathrm{a} / \mathrm{b}$ as the quantity formed by a parts of size $1 / b$ | Major | Sept.-April |
| 3.NF. 2 | Understand a fraction as a number on the number line; represent fractions on a number line diagram | Major | Sept.-April |
| 3.NF. 3 | Explain equivalence of fractions in special cases and compare fractions by reasoning about their size | Major | Sept.-April |

| Measurement and Data |  |  |  |
| :---: | :---: | :---: | :---: |
| 3.MD. 1 | Tell and write time to the nearest minute and measure the time intervals in minutes. Solve word problems involving addition and subtraction of time intervals in minutes | Major | Sept.-April |
| 3.MD. 2 | Measure and estimate liquid volumes and masses of objects using standard units of grams, kilograms, and liters. Add, subtract, multiply, or divide to solve onestep word problems involving masses or volumes | Major | Sept.-April |
| 3.MD. 3 | Draw a scaled picture graph and a scaled bar graph to represent a data set with several categories. Solve one- and two-step "how many more" and "how many less" problems using information presented in scaled bar graphs. | Supporting | Sept.-April |
| 3.MD. 4 | Generate measurement data by measuring using rulers marked with halves and fourths of an inch. Show the data by making a line plot | Supporting | May-June |
| 3.MD. 5 | Recognize area as an attribute of plane figures and understand concepts of area measurement | Major | Sept.-April |
| 3.MD. 6 | Measure areas by counting unit squares | Major | Sept.-April |
| 3.MD. 7 | Relate area to the operations of multiplication and division | Major | Sept.-April |
| 3.MD. 8 | Solve real world and mathematical problems involving perimeters of polygons | Additional | May-June |
| Geometry |  |  |  |
| 3.G.1 | Understand that shapes in different categories may share attributes and that the shared attributes can define a larger category. | Supporting | May-June |
| 3.G. 2 | Partition shapes into parts with equal areas. Express the area of each part as a unit fraction of the whole. | Supporting | Sept.-April |
| Key to $3.0 A .9$ <br> Common $3=3^{\text {rd }}$ Grade <br> Core OA $=$ Operations and Algebraic Thinking <br> Learning $9=$ CCLS number <br> Standard  <br> (CCLS)  <br> Code:  |  |  |  |

## Grade 4

| CCLS Code | Standard | Content Emphasis | Sept.-Aprill May-June Instructional Periods |
| :---: | :---: | :---: | :---: |
| Operations and Algebraic Thinking |  |  |  |
| 4.OA. 1 | Interpret a multiplication equation as a comparison. Represent verbal statements of multiplicative comparisons as multiplication equations. | Major | Sept.-April |
| 4.OA. 2 | Multiply or divide to solve word problems involving multiplicative comparison | Major | Sept.-April |
| 4.OA. 3 | Solve multistep word problems posed with whole numbers and having whole-number answers using the four operations, including problems in which remainders must be interpreted. Represent these problems using equations with a letter standing for the unknown quantity. Assess the reasonableness of answers using mental computation and estimation strategies including rounding. | Major | Sept.-April |
| 4.OA. 4 | Find all factor pairs for a whole number in the range $1-100$. Recognize that a whole number is a multiple of each of its factors. Determine whether a given whole number in the range $1-100$ is a multiple of a given one-digit number. Determine whether a given whole number in the range $1-100$ is prime or composite. | Supporting | Sept.-April |
| 4.OA. 5 | Generate a number or shape pattern that follows a given rule. Identify apparent features of the pattern that were not explicit in the rule itself. | Additional | Sept.-April |
| Number and Operations in Base Ten |  |  |  |
| 4.NBT. 1 | Recognize that in a multi-digit whole number, a digit in one place represents ten times what it represents in the place to its right | Major | Sept.-April |
| 4.NBT. 2 | Read and write multi-digit whole numbers using baseten numerals, number names, and expanded form. Compare two multi-digit numbers based on meanings of the digits in each place, using $>,=$, and $<$ | Major | Sept.-April |
| 4.NBT. 3 | Use place value understanding to round multi-digit whole numbers to any place. | Major | Sept.-April |
| 4.NBT. 4 | Fluently add and subtract multi-digit whole numbers using the standard algorithm | Major | Sept.-April |
| 4.NBT. 5 | Multiply a whole number of up to four digits by a onedigit whole number, and multiply two two-digit numbers, using strategies based on place value and the properties of operations. Illustrate and explain the calculation by using equations, rectangular arrays, and/or area models. | Major | Sept.-April |
| 4.NBT. 6 | Find whole-number quotients and remainders with up to four-digit dividends and one-digit divisors, using strategies based on place value, the properties of | Major | Sept.-April |

|  | operations, and/or the relationship between multiplication and division. Illustrate and explain the calculation by using equations, rectangular arrays, and/or area models. |  |  |
| :---: | :---: | :---: | :---: |
| Number and Operations--Fractions |  |  |  |
| 4.NF. 1 | Explain why a fraction $a / b$ is equivalent to a fraction $(n \times a) /(n \times b)$ by using visual fraction models, with attention to how the number and size of the parts differ even though the two fractions themselves are the same size. Use this principle to recognize and generate equivalent fractions. | Major | Sept.-April |
| 4.NF. 2 | Compare two fractions with different numerators and different denominators. Recognize that comparisons are valid only when the two fractions refer to the same whole. Record the results of comparisons with symbols $>,=$, or $<$, and justify the conclusions. | Major | Sept.-April |
| 4.NF. 3 | Understand a fraction $a / b$ with $a>1$ as a sum of fractions $1 / b$. | Major | Sept.-April |
| 4.NF. 4 | Apply and extend previous understandings of multiplication to multiply a fraction by a whole number. | Major | Sept.-April |
| 4.NF. 5 | Express a fraction with denominator 10 as an equivalent fraction with denominator 100, and use this technique to add two fractions with respective denominators 10 and 100. | Major | May-June |
| 4.NF. 6 | Use decimal notation for fractions with denominators 10 or 100. | Major | May-June |
| 4.NF. 7 | Compare two decimals to hundredths by reasoning about their size. Recognize that comparisons are only valid when the two decimals refer to the same whole. Record the results of comparisons with the symbols $>,=$, or < and justify the conclusions | Major | May-June |
| Measurement and Data |  |  |  |
| 4.MD. 1 | Know relative sizes of measurement units within one system of units including km, m, cm, kg, g; lb, oz.; l, ml ; hr, min, sec. Within a single system of measurement, express measurements in a larger unit in terms of a smaller unit. Record measurement equivalents in a two-column table. | Supporting | May-June |
| 4.MD. 2 | Use the four operations to solve word problems involving distances, intervals of time, liquid volumes, masses of objects, and money, including problems involving simple fractions or decimals, and problems that require expressing measurements given in a larger unit in terms of a smaller unit. Represent measurement quantities using diagrams such as number line diagrams that feature a measurement scale. | Supporting | May-June |
| 4.MD. 3 | Apply the area and perimeter formulas for rectangles in real world and mathematical problems | Supporting | Sept.-April |
| 4.MD. 4 | Make a line plot to display a data set of | Supporting | Sept.-April |

## Grade 5

| CCLS Code | Standard | Content Emphasis | Sept.-April/ May-June Instructional Periods |
| :---: | :---: | :---: | :---: |
| Operations and Algebraic Thinking |  |  |  |
| 5.OA.1 | Use parentheses, brackets, or braces in numerical expressions, and evaluate expressions with these symbols | Additional | Sept.-April |
| 5.OA. 2 | Write simple expressions that record calculations with numbers, and interpret numerical expressions without evaluating them. | Additional | Sept.-April |
| 5.OA. 3 | Generate two numerical patterns using two given rules. Identify apparent relationships between corresponding terms. Form ordered pairs consisting of corresponding terms from the two patterns, and graph the ordered pairs on a coordinate plane. | Additional | May-June |
| Number and Operations in Base Ten |  |  |  |
| 5.NBT. 1 | Recognize that in a multi-digit whole number a digit in one place represents 10 times as much as it represents in the place to its right and $1 / 10$ of what it represents in the place to its left | Major | Sept.-April |
| 5.NBT. 2 | Explain patterns in the number of zeroes of the product when multiplying a number by powers of 10 , and explain patterns in the placement of the decimal point when a decimal is multiplied or divided by a power of 10 . Use whole-number exponents to denote powers of 10 . | Major | Sept.-April |
| 5.NBT. 3 | Read, write, and compare decimals to thousandths. | Major | Sept.-April |
| 5.NBT. 4 | Use place value understanding to round decimals to any place. | Major | Sept.-April |
| 5.NBT. 5 | Fluently multiply multi-digit whole numbers using the standard algorithm | Major | Sept.-April |
| 5.NBT. 6 | Find whole-number quotients of whole numbers with up to four-digit dividends and two-digit divisors, using strategies based on place value, the properties of operations, and/or the relationship between multiplication and division. Illustrate and explain the calculation by using equations, rectangular arrays, and/or area models. | Major | Sept.-April |
| 5.NBT. 7 | Add, subtract, multiply, and divide decimals to hundredths, using concrete models or drawings and strategies based on place value, properties of operations, and/or the relationship between addition and subtraction; relate the strategy to a written method and explain the reasoning used. | Major | Sept.-April |
| Number and Operations-Fractions |  |  |  |
| 5.NF. 1 | Add and subtract fractions with unlike denominators (including mixed numbers) by replacing given | Major | Sept.-April |

|  | fractions with equivalent fractions in such a way as to produce an equivalent sum or difference of fractions with like denominators. |  |  |
| :---: | :---: | :---: | :---: |
| 5.NF. 2 | Solve word problems involving addition and subtraction of fractions referring to the same whole, including cases of unlike denominators. Use benchmark fractions and number sense of fractions to estimate mentally and assess the reasonableness of answers | Major | Sept.-April |
| 5.NF. 3 | Interpret a fraction as division of the numerator by the denominator. Solve word problems involving division of whole numbers leading to answers in the form of fractions or mixed numbers | Major | Sept.-April |
| 5.NF. 4 | Apply and extend previous understandings of multiplication to multiply a fraction or whole number by a fraction. | Major | Sept.-April |
| 5.NF. 5 | Interpret multiplication as scaling (resizing), by: a. Comparing the size of a product to the size of one factor on the basis of the size of the other factor, without performing the indicated multiplication b. Explaining why multiplying a given number by a fraction greater than 1 results in a product greater than the given number (recognizing multiplication by whole numbers greater than 1 as a familiar case); explaining why multiplying a given number by a fraction less than 1 results in a product smaller than the given number; and relating the principle of fraction equivalence $a / b=(n \times a) /(n \times b)$ to the effect of multiplying $a / b$ by 1. | Major | Sept.-April |
| 5.NF. 6 | Solve real world problems involving multiplication of fractions and mixed numbers, e.g., by using visual fraction models or equations to represent the problem. | Major | Sept.-April |
| 5.NF. 7 | Apply and extend previous understandings of division to divide unit fractions by whole numbers and whole numbers by unit fractions | Major | Sept.-April |
| Measurement and Data |  |  |  |
| 5.MD. 1 | Convert among different-sized standard measurement units within a given measurement system, and use these conversions in solving multistep, real world problems. | Supporting | Sept.-April |
| 5.MD. 2 | Make a line plot to display a data set of measurements in fractions of a unit. Use operations on fractions for this grade to solve problems involving information presented in line plots. | Supporting | Sept.-April |
| 5.MD. 3 | Recognize volume as an attribute of solid figures and understand concepts of volume measurement. | Major | Sept.-April |
| 5.MD. 4 | Measure volumes by counting unit cubes, using cubic cm , cubic in, cubic ft , and improvised units. | Major | Sept.-April |
| 5.MD. 5 | Relate volume to the operations of multiplication and addition and solve real world and mathematical problems involving volume. | Major | Sept.-April |

## Grade 6

| CCLS Code | Standard | Content Emphasis | Sept.-April/ May-June Instructional Periods |
| :---: | :---: | :---: | :---: |
| Ratios and Proportional Relationships |  |  |  |
| 6.RP. 1 | Understand the concept of a ratio and use ratio language to describe a ratio relationship between two quantities | Major | Sept.-April |
| 6.RP. 2 | Understand the concept of a unit rate $a / b$ associated with a ratio $a: b$ with $b \neq 0$, and use rate language in the context of a ratio relationship | Major | Sept.-April |
| 6.RP. 3 | Use ratio and rate reasoning to solve real-world and mathematical problems, e.g., by reasoning about tables of equivalent ratios, tape diagrams, double number line diagrams, or equations. | Major | Sept.-April |
| The Number System |  |  |  |
| 6.NS. 1 | Interpret and compute quotients of fractions, and solve word problems involving division of fractions by fractions, e.g., by using visual fraction models and equations to represent the problem | Majo | Sept.-April |
| 6.NS. 2 | Fluently divide multi-digit numbers using the standard algorithm | Additional | Sept.-April |
| 6.NS. 3 | Fluently add, subtract, multiply, and divide multi-digit decimals using the standard algorithm for each operation | Additional | Sept.-April |
| 6.NS. 4 | Find the greatest common factor of two whole numbers less than or equal to 100 and the least common multiple of two whole numbers less than or equal to 12 . Use the distributive property to express a sum of two whole numbers 1-100 with a common factor as a multiple of a sum of two whole numbers with no common factor | Additional | Sept.-April |
| 6.NS. 5 | Understand that positive and negative numbers are used together to describe quantities having opposite directions or values; use positive and negative numbers to represent quantities in real-world contexts, explaining the meaning of 0 in each situation | Major | Sept.-April |
| 6.NS. 6 | Understand a rational number as a point on the number line. Extend number line diagrams and coordinate axes familiar from previous grades to represent points on the line and in the plane with negative number coordinates. | Major | Sept.-April |
| 6.NS. 7 | Understand ordering and absolute value of rational numbers | Major | Sept.-April |
| 6.NS. 8 | Solve real-world and mathematical problems by graphing points in all four quadrants of the coordinate plane. Include use of coordinates and absolute value to find distances between points with the same first | Major | Sept.-April |

|  | coordinate or the same second coordinate |  |  |
| :---: | :---: | :---: | :---: |
| Expressions and Equations |  |  |  |
| 6.EE. 1 | Write and evaluate numerical expressions involving whole-number exponents. | Major | Sept.-April |
| 6.EE. 2 | Write, read, and evaluate expressions in which letters stand for numbers | Major | Sept.-April |
| 6.EE. 3 | Apply the properties of operations to generate equivalent expressions. | Major | Sept.-April |
| 6.EE. 4 | Identify when two expressions are equivalent (i.e., when the two expressions name the same number regardless of which value is substituted into them). | Major | Sept.-April |
| 6.EE. 5 | Understand solving an equation or inequality as a process of answering a question: which values from a specified set, if any, make the equation or inequality true? Use substitution to determine whether a given number in a specified set makes an equation or inequality true | Major | Sept.-April |
| 6.EE. 6 | Use variables to represent numbers and write expressions when solving a real-world or mathematical problem; understand that a variable can represent an unknown number, or, depending on the purpose at hand, any number in a specified set | Major | Sept.-April |
| 6.EE. 7 | Solve real-world and mathematical problems by writing and solving equations of the form $x+p=q$ and $p x=q$ for cases in which $p, q$ and $x$ are all nonnegative rational numbers | Major | Sept.-April |
| 6.EE. 8 | Write an inequality of the form $x>c$ or $x<c$ to represent a constraint or condition in a real-world or mathematical problem. Recognize that inequalities of the form $x>c$ or $x<c$ have infinitely many solutions; represent solutions of such inequalities on number line diagrams | Major | Sept.-April |
| 6.EE. | Use variables to represent two quantities in a realworld problem that change in relationship to one another; write an equation to express one quantity, thought of as the dependent variable, in terms of the other quantity, thought of as the independent variable. Analyze the relationship between the dependent and independent variables using graphs and tables, and relate these to the equation. | Major | Sept-April |
| Geometry |  |  |  |
| 6.G. 1 | Find the area of right triangles, other triangles, special quadrilaterals, and polygons by composing into rectangles or decomposing into triangles and other shapes; apply these techniques in the context of solving real-world and mathematical problems. | Supporting | Sept.-April |
| 6.G. 2 | Find the volume of a right rectangular prism with fractional edge lengths by packing it with unit cubes of the appropriate unit fraction edge lengths, and show that the volume is the same as would be found by multiplying the edge lengths of the prism. Apply the formulas $V=I w h$ and $V=b h$ to find volumes of | Supporting | Sept.-April |

|  | right rectangular prisms with fractional edge lengths <br> in the context of solving real-world and mathematical <br> problems. |  |  |
| :--- | :--- | :--- | :--- |
| 6.G.3 | Draw polygons in the coordinate plane given <br> coordinates for the vertices; use coordinates to find <br> the length of a side joining points with the same first <br> coordinate or the same second coordinate. Apply <br> these techniques in the context of solving real-world <br> and mathematical problems | Supporting | Sept.-April |
| 6.G.4 | Represent three-dimensional figures using nets made <br> up of rectangles and triangles, and use the nets to <br> find the surface area of these figures. Apply these <br> techniques in the context of solving real-world and <br> mathematical problems. | Supporting | Sept.-April |
| Statistics and Probability | Mdditional | May-June |  |
| 6.SP.1 | Recognize a statistical question as one that <br> anticipates variability in the data related to the <br> question and accounts for it in the answers. | May-June |  |
| 6.SP.2 | Understand that a set of data collected to answer a <br> statistical question has a distribution which can be <br> described by its center, spread, and overall shape | Additional | Mare |
| 6.SP.3 | Recognize that a measure of center for a numerical <br> data set summarizes all of its values with a single <br> number, while a measure of variation describes how <br> its values vary with a single number | Additional | May-June |
| 6.SP.4 | Display numerical data in plots on a number line, <br> including dot plots, histograms, and box plots | Additional | May-June |
| 6.SP.5 | Summarize numerical data sets in relation to their <br> context, such as by: <br> a. Reporting the number of observations <br> b. Describing the nature of the attribute under <br> investigation, including how it was measured and its <br> units of measurement. <br> c. Giving quantitative measures of center (median <br> and/or mean) and variability (interquartile range <br> and/or mean absolute deviation), as well as <br> describing any overall pattern and any striking <br> deviations from the overall pattern with reference to <br> the context in which the data were gathered. <br> d. Relating the choice of measures of center and <br> variability to the shape of the data distribution and the <br> context in which the data were gathered. | Additional | May-June |
|  |  |  |  |

## Grade 7

| CCLS Code | Standard | Content Emphasis | Sept.-April/ May-June Instructional Periods |
| :---: | :---: | :---: | :---: |
| Ratios and Proportional Relationships |  |  |  |
| 7.RP. 1 | Compute unit rates associated with ratios of fractions, including ratios of lengths, areas and other quantities measured in like or different units. | Major | Sept.-April |
| 7.RP. 2 | Recognize and represent proportional relationships between quantities | Major | Sept.-April |
| 7.RP. 3 | Use proportional relationships to solve multistep ratio and percent problems | Major | Sept.-April |
| The Number System |  |  |  |
| 7.NS. 1 | Apply and extend previous understandings of addition and subtraction to add and subtract rational numbers; represent addition and subtraction on a horizontal or vertical number line diagram | Major | Sept.-April |
| 7.NS. 2 | Apply and extend previous understandings of multiplication and division and of fractions to multiply and divide rational numbers. | Major | Sept.-April |
| 7.NS. 3 | Solve real-world and mathematical problems involving the four operations with rational numbers | Major | Sept.-April |
| Expressions and Equations |  |  |  |
| 7.EE. 1 | Apply properties of operations as strategies to add, subtract, factor, and expand linear expressions with rational coefficients. | Major | Sept.-April |
| 7.EE. 2 | Understand that rewriting an expression in different forms in a problem context can shed light on the problem and how the quantities in it are related. | Major | Sept.-April |
|  | Solve multi-step real-life and mathematical problems posed with positive and negative rational numbers in any form (whole numbers, fractions, and decimals), using tools strategically. Apply properties of operations to calculate with numbers in any form; convert between forms as appropriate; and assess the reasonableness of answers using mental computation and estimation strategies. | Major | Sept.-April |
| 7.EE. 4 | Use variables to represent quantities in a real-world or mathematical problem, and construct simple equations and inequalities to solve problems by reasoning about the quantities. <br> a. Solve word problems leading to equations of the form $p x+q=r$ and $p(x+q)=r$, where $p, q$, and $r$ are specific rational numbers. Solve equations of these forms fluently. Compare an algebraic solution to an arithmetic solution, identifying the sequence of the operations used in each approach. <br> b. Solve word problems leading to inequalities of the form $p x+q>r$ or $p x+q<r$, where $p, q$, and $r$ are | Major | Sept.-April |

|  | specific rational numbers. Graph the solution set of <br> the inequality and interpret it in the context of the <br> problem. |  |  |
| :--- | :--- | :--- | :--- |
| Geometry | Solve problems involving scale drawings of geometric <br> figures, such as computing actual lengths and areas <br> from a scale drawing and reproducing a scale <br> drawing at a different scale. | Additional | Sept.-April |
| 7.G.1 | Draw (freehand, with ruler and protractor, and with <br> technology) geometric shapes with given conditions. <br> Focus on constructing triangles from three measures <br> of angles or sides, noticing when the conditions <br> determine a unique triangle, more than one triangle, <br> or no triangle. | Additional | May-June |
| 7.G.2 | Describe the two-dimensional figures that result from <br> slicing three-dimensional figures, as in plane sections <br> of right rectangular prisms and right rectangular <br> pyramids. | Additional | May-June |
| 7.G.3 | Know the formulas for the area and circumference of <br> a circle and solve problems; give an informal <br> derivation of the relationship between the <br> circumference and area of a circle. | Additional | Sept.-April |
| 7.G.4 | Use facts about supplementary, complementary, <br> vertical, and adjacent angles in a multi-step problem <br> to write and use them to solve simple equations for <br> an unknown angle in a figure | Additional | May-June |
| 7.SP.5 | Solve real-world and mathematical problems <br> involving area, volume and surface area of two- and <br> three-dimensional objects composed of triangles, <br> quadrilaterals, polygons, cubes, and right prisms | Additional | May-June |
| 7.SP.4 | Understand that the probability of a chance event is a <br> populations. <br>  <br> informal comparative inferences about two | Supporting | Sept.-April |
| 7.G.6 mexpressing it as a multiple of a measure of variability. |  |  |  |

|  | number between 0 and 1 that expresses the <br> likelihood of the event occurring. Larger numbers <br> indicate greater likelihood. |  |  |
| :--- | :--- | :--- | :--- |
| 7.SP.6 | Approximate the probability of a chance event by <br> collecting data on the chance process that produces it <br> and observing its long-run relative frequency, and <br> predict the approximate relative frequency given the <br> probability. | Supporting | Sept.-April |
| 7.SP.7 | Develop a probability model and use it to find <br> probabilities of events. Compare probabilities from a <br> model to observed frequencies; if the agreement is <br> not good, explain possible sources of the discrepancy | Supporting | Sept,-April |
| 7.SP.8 | Find probabilities of compound events using <br> organized lists, tables, tree diagrams, and simulation. | Supporting | Sept.-April |

| Key to | 7.G.4 |
| :--- | :--- |
| Common | $7=7^{\text {th }}$ Grade |
| Core | G $=$ Geometry |
| Learning | $4=$ CCLS number |

## Grade 8

| CCLS Code | Standard | Content Emphasis | Sept.-Aprill May-June Instructional Periods |
| :---: | :---: | :---: | :---: |
| The Number System |  |  |  |
| 8.NS. 1 | Know that numbers that are not rational are called irrational. Understand informally that every number has a decimal expansion; for rational numbers show that the decimal expansion repeats eventually, and convert a decimal expansion which repeats eventually into a rational number. | Supporting | May-June |
| 8.NS. 2 | Use rational approximations of irrational numbers to compare the size of irrational numbers, locate them approximately on a number line diagram, and estimate the value of expressions (e.g., $\pi^{2}$ ). | Supporting | May-June |
| Expressions and Equations |  |  |  |
| 8.EE. 1 | Know and apply the properties of integer exponents to generate equivalent numerical expressions. | Major | Sept.-April |
| 8.EE. 2 | Use square root and cube root symbols to represent solutions to equations of the form $x^{2}=p$ and $x^{3}=p$, where $p$ is a positive rational number. Evaluate square roots of small perfect squares and cube roots of small perfect cubes. Know that $\sqrt{ } 2$ is irrational. | Major | May-June |
| 8.EE. 3 | Use numbers expressed in the form of a single digit times an integer power of 10 to estimate very large or very small quantities, and to express how many times as much one is than the other. | Major | Sept.-April |
| 8.EE. 4 | Perform operations with numbers expressed in scientific notation, including problems where both decimal and scientific notation are used. Use scientific notation and choose units of appropriate size for measurements of very large or very small quantities | Major | Sept.-April |
| 8.EE. 5 | Graph proportional relationships, interpreting the unit rate as the slope of the graph. Compare two different proportional relationships represented in different ways. | Major | Sept.-April |
| 8.EE. 6 | Use similar triangles to explain why the slope $m$ is the same between any two distinct points on a nonvertical line in the coordinate plane; derive the equation $y=m x$ for a line through the origin and the equation $y=m x+b$ for a line intercepting the vertical axis at $b$. | Major | Sept.-April |
| 8.EE. 7 | Solve linear equations in one variable. | Major | Sept.-April |
| 8.EE. 8 | Analyze and solve pairs of simultaneous linear equations. | Major | Sept.-April |
| Functions |  |  |  |
| 8.F. 1 | Understand that a function is a rule that assigns to each input exactly one output. The graph of a function | Major | Sept.-April |

|  | is the set of ordered pairs consisting of an input and the corresponding output |  |  |
| :---: | :---: | :---: | :---: |
| 8.F. 2 | Compare properties of two functions each represented in a different way (algebraically, graphically, numerically in tables, or by verbal descriptions). | Major | Sept.-April |
| 8.F. 3 | Interpret the equation $y=m x+b$ as defining a linear function, whose graph is a straight line; give examples of functions that are not linear. | Major | Sept.-April |
| 8.F. 4 | Construct a function to model a linear relationship between two quantities. Determine the rate of change and initial value of the function from a description of a relationship or from two ( $x, y$ ) values, including reading these from a table or from a graph. Interpret the rate of change and initial value of a linear function in terms of the situation it models, and in terms of its graph or a table of values. | Supporting | Sept.-April |
| 8.F. 5 | Describe qualitatively the functional relationship between two quantities by analyzing a graph (e.g., where the function is increasing or decreasing, linear or nonlinear). Sketch a graph that exhibits the qualitative features of a function that has been described verbally. | Supporting | Sept.-April |
| Geometry |  |  |  |
| 8.G.1 | Verify experimentally the properties of rotations, reflections, and translations: <br> a. Lines are taken to lines, and line segments to line segments of the same length. <br> b. Angles are taken to angles of the same measure. <br> c. Parallellines are taken to parallel lines. | Major | Sept.-April |
| 8.G. 2 | Understand that a two-dimensional figure is congruent to another if the second can be obtained from the first by a sequence of rotations, reflections, and translations; given two congruent figures, describe a sequence that exhibits the congruence between them. | Major | Sept.-April |
| 8.G. 3 | Describe the effect of dilations, translations, rotations, and reflections on two-dimensional figures using coordinates. | Major | Sept.-April |
| 8.G. 4 | Understand that a two-dimensional figure is similar to another if the second can be obtained from the first by a sequence of rotations, reflections, translations, and dilations; given two similar two-dimensional figures, describe a sequence that exhibits the similarity between them. | Major | Sept.-April |
| 8.G. 5 | Use informal arguments to establish facts about the angle sum and exterior angle of triangles, about the angles created when parallel lines are cut by a transversal, and the angle-angle criterion for similarity of triangles. | Major | Sept.-April |
| 8.G.6 | Explain a proof of the Pythagorean Theorem and its | Major | May-June |

|  | converse. |  |  |
| :---: | :---: | :---: | :---: |
| 8.G.7 | Apply the Pythagorean Theorem to determine unknown side lengths in right triangles in real-world and mathematical problems in two and three dimensions | Major | May-June |
| 8.G.8 | Apply the Pythagorean Theorem to find the distance between two points in a coordinate system. | Major | May-June |
| 8.G. 9 | Know the formulas for the volumes of cones, cylinders, and spheres and use them to solve realworld and mathematical problems. | Additional | Sept.-April |
| Statistics and Probability |  |  |  |
| 8.SP. 1 | Construct and interpret scatter plots for bivariate measurement data to investigate patterns of association between two quantities. Describe patterns such as clustering, outliers, positive or negative association, linear association, and nonlinear association. | Supporting | Sept.-April |
| 8.SP. 2 | Know that straight lines are widely used to model relationships between two quantitative variables. For scatter plots that suggest a linear association, informally fit a straight line, and informally assess the model fit by judging the closeness of the data points to the line. | Supporting | Sept.-April |
| 8.SP. 3 | Use the equation of a linear model to solve problems in the context of bivariate measurement data, interpreting the slope and intercept. | Supporting | Sept.-April |
| 8.SP. 4 | Understand that patterns of association can also be seen in bivariate categorical data by displaying frequencies and relative frequencies in a two-way table. Construct and interpret a two-way table summarizing data on two categorical variables collected from the same subjects. Use relative frequencies calculated for rows or columns to describe possible association between the two variables. | Supporting | Sept.-April |
